

BAHRUDDIN FARID DHIYAUURRAHMAN

SOFTWARE DEVELOPER

+6283830681912 | bfaridrahman@gmail.com | linkedin.com/in/merhmn | https://porto.faridrhmn.my.id

PROFILE

Software developer with a focus on web-based applications. Experienced in using CodeIgniter, Vue.js, and Play Framework to build functional and efficient systems, including end-to-end development from scratch to deployment.

EXPERIENCE

Full time, **PT. Farma Global Teknologi – Sleman (DIY)** *November 2024 – Present*

Farma Global Teknologi is a healthcare technology company that provides digital solutions to improve data management and operational efficiency in medical services. It helps healthcare providers streamline administrative processes and connect them with clinical workflows through integrated systems. The main focus of Farmagitech includes developing web-based applications, managing healthcare data, and supporting digital transformation to enhance service quality and patient outcomes.

As part of the development team, I contributed to

- Contributed as part of the development team in building and maintaining key healthcare systems
- Developed and maintained a web-based Hospital Information System (SIMRS) using CodeIgniter
- Built an E-Doc application using Vue.js for efficient document management
- Designed and developed a web-based PACS system from scratch using Play Framework
- Defined system architecture, developed APIs, and managed medical imaging workflows within the PACS system

Internship, **PT. Seigan Teknologi Berdikari – Sleman (DIY)** *January 2024 – March 2024*

PT. Seigan Teknologi Berdikari is a software house that specializes in developing customized software solutions for various clients, focusing on building scalable and efficient web-based applications.

- Worked on web development using the CodeIgniter framework
- Contributed to the development and maintenance of system features

Part time, **Laboratory Assistant – UPN Veteran Yogyakarta (DIY)** *August 2022 – July 2024*

- Assisted students in understanding course materials and completing practical assignments
- Guided and mentored students in programming and system-related laboratory courses, including Algorithms, OOP, Databases, and Computer Networks
- Acted as Laboratory Coordinator for Object-Oriented Programming, ensuring smooth lab operations and assisting in course execution

PROJECT PORTFOLIO

Web-Based PACS System – (Play Framework, PostgreSQL)

- Developed a medical imaging management system based on DICOM (.dcm) from scratch
- Implemented data storage, retrieval processes, and system APIs
- Performed system deployment and troubleshooting
- Successfully delivered and deployed the system to a production environment used by a hospital, with ongoing integration for two additional healthcare institutions

Ship Path Detection System – Indonesian Ship Contest (Kontes Kapal Indonesia / KKI) – (Python, IoT)

- Led a team in developing a computer vision-based path detection system
- Integrated Arduino, a mini PC, and an underwater camera
- Contributed to the design and implementation of the autonomous vessel system

PROJECT PORTFOLIO

Javanese Script Image Detection System (Thesis) – (Python, Machine Learning)

- Developed an image-based system for detecting and classifying Javanese script
- Collected and processed image datasets from both primary and secondary sources
- Implemented feature extraction using the Freeman Chain Code (FCC) method
- Built a classification model using Support Vector Machine (SVM)
- Developed a simple user interface using HTML, CSS, and JavaScript for result visualization

Desktop-Based Invoice Manager – (Java, JavaFX, SQLite)

- Developed a desktop application for invoice management and transaction tracking
- Implemented the user interface using JavaFX
- Designed and managed a local database using SQLite for data storage

Web-Based CRM Application – (PHP, CodeIgniter 3, MySQL)

- Developed a customer and transaction management system
- Implemented data processing and reporting features

UMKM Website – (TypeScript, React, Firebase)

- Developed a website using React and TypeScript
- Integrated Firebase for database management and deployed the application using Firebase Hosting

COURSES AND OTHER ACTIVITIES

- Associate Data Scientist Certificate – **National Professional Certification Agency (BNSP)**
- Junior Web Programmer Certificate – **National Professional Certification Agency (BNSP)**
- Scrum Fundamentals Certified Course - **SCRUMstudy**
- Basic Project Management Course - **Dicoding Indonesia**
- Programming Fundamentals for Software Development - **Dicoding Indonesia**
- Basic Structured Query Language (SQL) - **Dicoding Indonesia**
- Basic JavaScript Programming - **Dicoding Indonesia**

AWARDS

- 3rd Place, Robot Contest (Soccer Robot Simulation Category) - **UPN Veteran Yogyakarta**
- Funded Participant PKM-K 2023 (Student Creativity Program in Entrepreneurship) - **UPN Veteran Yogyakarta**
- Finalist – Indonesian Ship Contest (KKI) 2024, Autonomous Category - **UPN Veteran Yogyakarta**

SKILLS

Soft Skills

- Problem Solving
- Critical Thinking
- Teamwork and Collaboration

Hard Skills

- Programming Languages: C++, PHP, JavaScript, Java, Scala
- Web Development: CodeIgniter, Vue.js, React, REST API
- Databases: MySQL, PostgreSQL, SQLite

EDUCATION

- UPN “Veteran” Yogyakarta – Bachelor of Computer Science (S.Kom), Informatics **2021 – 2025**
